AREA DISASTER EVALUATION & TELEMETRIC ASSESSMENT REPORT

Real-Time Telemetry Analysis • Generated: 2026-10-04 08:16:59 UTC • Incident ID: risk-est-loc-delhi

MANDATORY SAFETY DISCLAIMER: “This student project is for disaster awareness and monitoring only. Always follow official instructions from local authorities, disaster-management agencies, and emergency services. It never claims to control emergency services, dispatch help, or replace official disaster-management authorities.”

1. Geographic Location & Hazard Classification

Target Area / Location	New Delhi, Delhi NCR
Geographic Coordinates	28.6139°, 77.2090°
Disaster Category	Flood Risk
Assessed Severity Level	LOW
Operational Status	Estimated Risk
Initial Incident Title	Estimated Flood Risk - New Delhi, India

2. Real-Time Telemetric Sensor Readings

Physical Parameter	Measured Telemetric Value	Measurement Unit / Context
24h Cumulative Precipitation	0.0 mm	Open-Meteo High-Resolution Precipitation
10m Sustained Wind Speed	10.4 km/h	Surface Atmospheric Kinetic Velocity
Ambient Surface Temperature	34.3 °C	2-meter Ambient Observation

3. Scientific Basis of Disaster Assessment

TRIGGERED EVALUATION RULE:
Normal/minimal rainfall observed (Hourly: 0.0 mm, 24h: 0.0 mm). Well below flood thresholds.

Decision Threshold Benchmarks (Python Risk Engine):

Severity Tier	Scientific Benchmark Criterion	Assessed Status for this Area
Low	24h rain <= 20mm & hourly <= 5mm	MATCHED
Medium	24h rain 20-50mm or hourly 5-15mm	Passed
High	24h rain 50-100mm or hourly 15-30mm	Passed
Critical	24h rain > 100mm or hourly > 30mm	Passed

4. Immediate Emergency Directives for this Hazard

OFFICIAL SAFETY DIRECTIVE:
Avoid walking/driving through flood water; move to safer higher ground when instructed by authorities.

5. Data Provenance & Scientific Audit Trail

Reporting Scientific Body	Open-Meteo Real-Time Weather Service
Event Timestamp	2026-10-04T12:45
Database Ingest Timestamp	2026-10-04T08:16:51.973325+00:00
Raw Telemetry Verification Link	https://open-meteo.com/en/docs#latitude=28.6139&longitude=77.209
